# About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

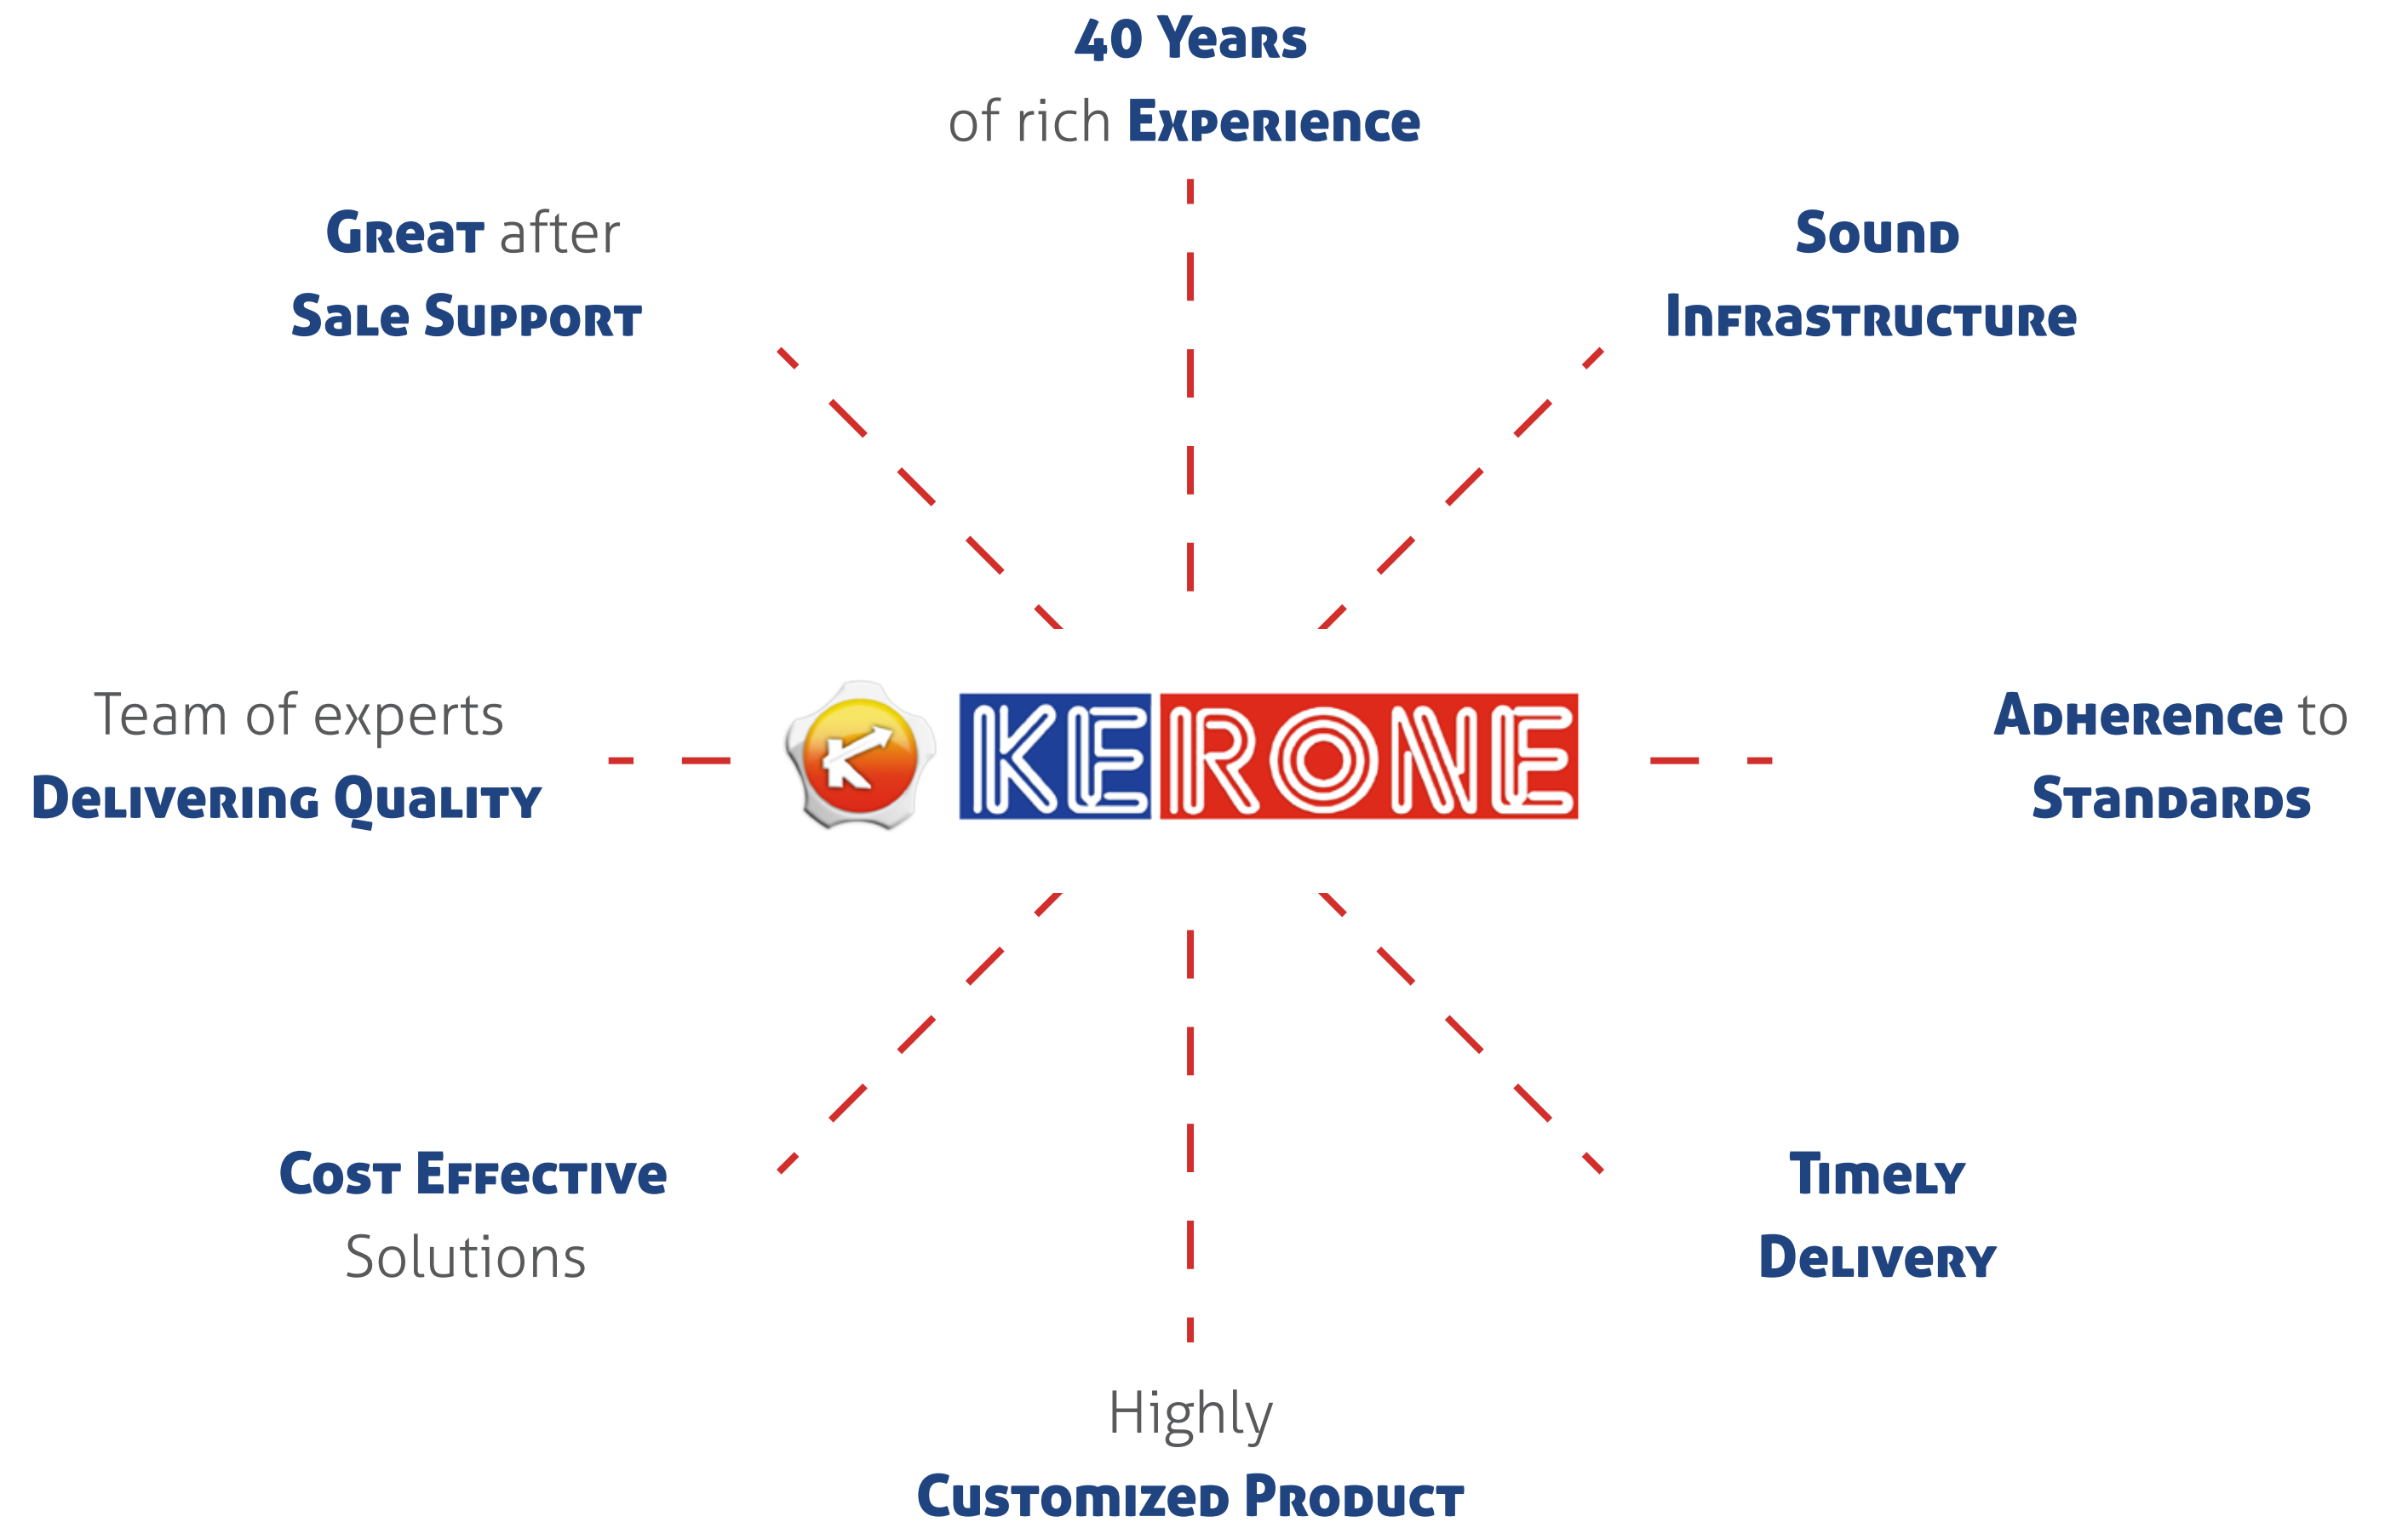

**“Enhance the value of customer operation through our customer need centric engineering solution”**

## *Mission*

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

## *Vision*

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

## Introduction to Flat Belt Ovens

We take a common sense approach to the designs and keep it simple for installation, maintenance, and operation. Most insulated oven chambers have hinged or removable doors along the sides to allow full access. Heaters can be mounted to adjustable supports for easy heater positioning. This allows you to direct the infrared energy where you need it for greater efficiency.

Product temperatures of 150 degrees F to 600 degrees F are common for Conveyorized Ovens, while higher temperatures can be achieved. We also offer cooling sections to our conveyor ovens to reduce the part temperature for handling.

Flat Belt Conveyorized Ovens are widely used in manufacturing facilities throughout the world for a multitude of process heating applications such as laminating, bonding, curing, annealing, drying, and preheating just to name a few. Our sales engineers will gladly assist you with specifying a custom oven for your application.
