About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

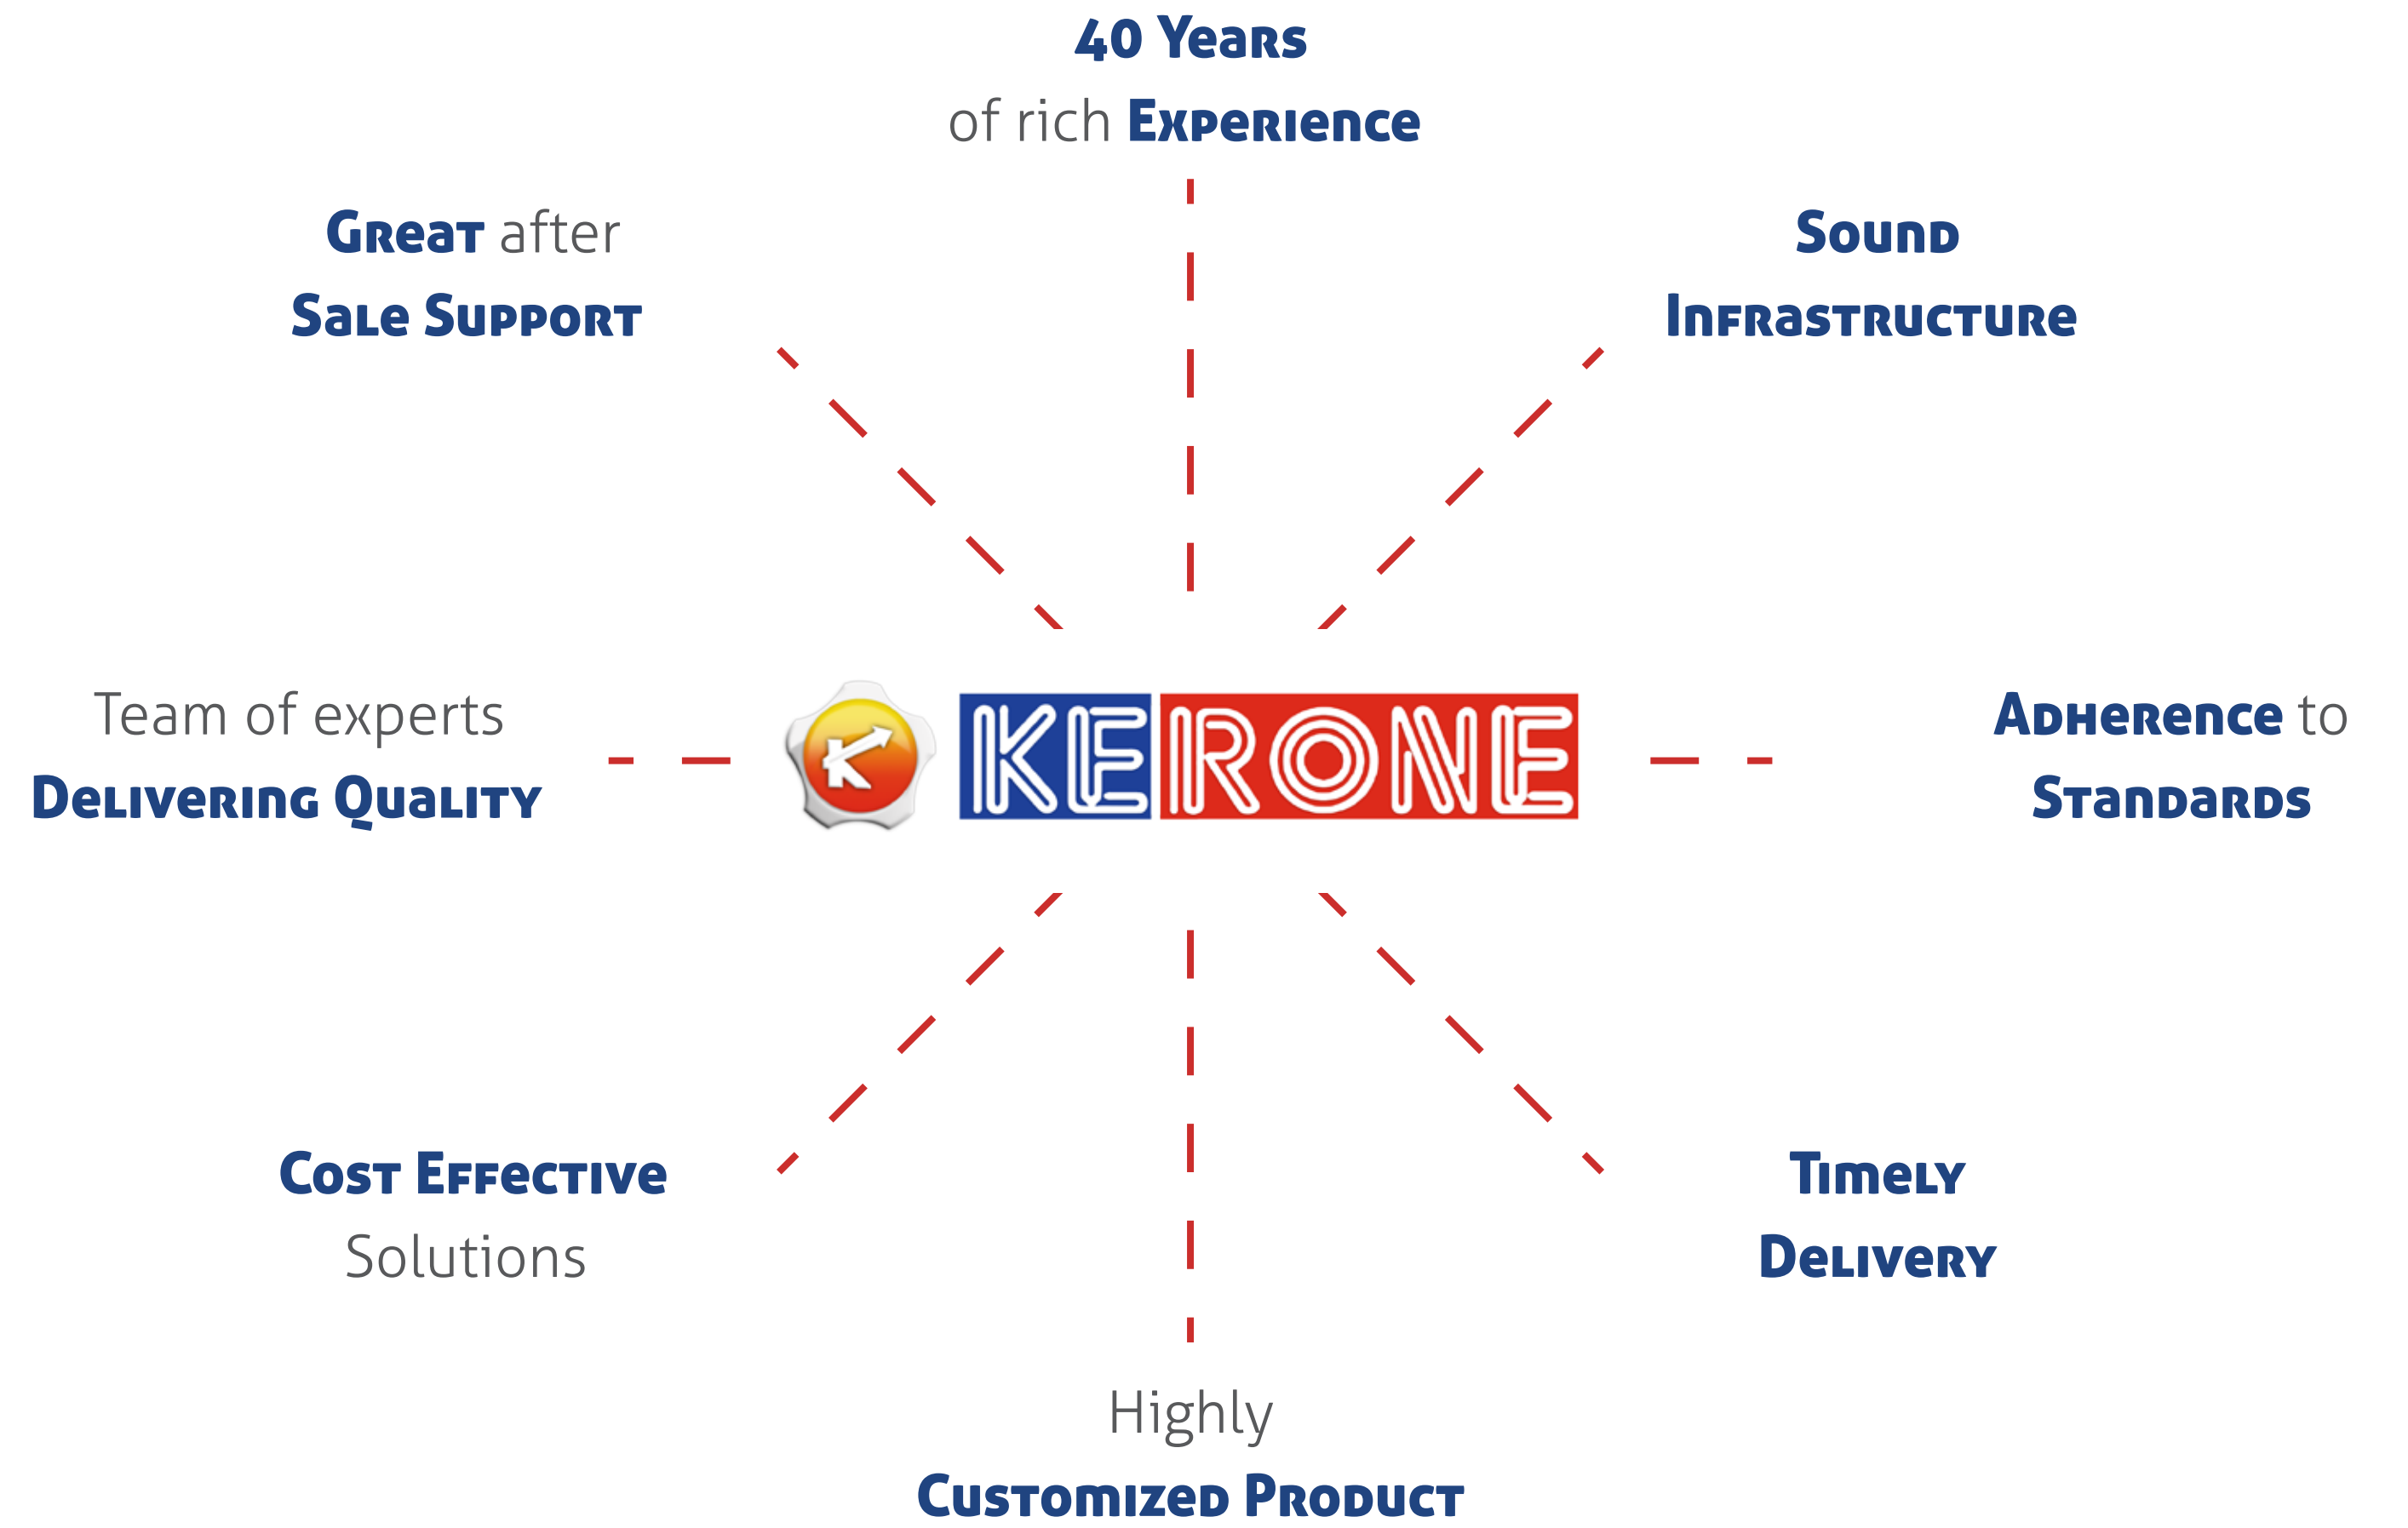

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to

High performance Infrared Heaters

For the process those have high temperature requirement, for such applications high performance Infrared Heaters are more suitable and designed with care to generate and sustain to such high temperature requirement, hence the high performance Infrared Heater heat exchangers are ceramic infrared rod heat exchanger (radiators), which can operate for temperatures up to 1000° C and surface rating up to 87 kw/m².

To achieve the high efficiency and heat transfer of upto 80% the radiators are gold-plated ceramic parabolic reflector. In this way, these radiators allow material temperatures of up to 700° C or high through speeds. The typical operating temperature of 1000° C is reached in less than one minute.

High performance Infrared heaters are best suitable in applications such as plant construction in which special solution has to be drawn up for the customer's specific needs and for applications requiring high outputs.

Features

- Gold plated reflectors for efficient heat transfer.
- Operating temperature 1000o C
- Very low response time
- Available in 375w/115v and 750w/ 230v
