ISO 9001-2008 | ISO 9001-2015 | EMS 14001 | OHSAS 18001

# About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

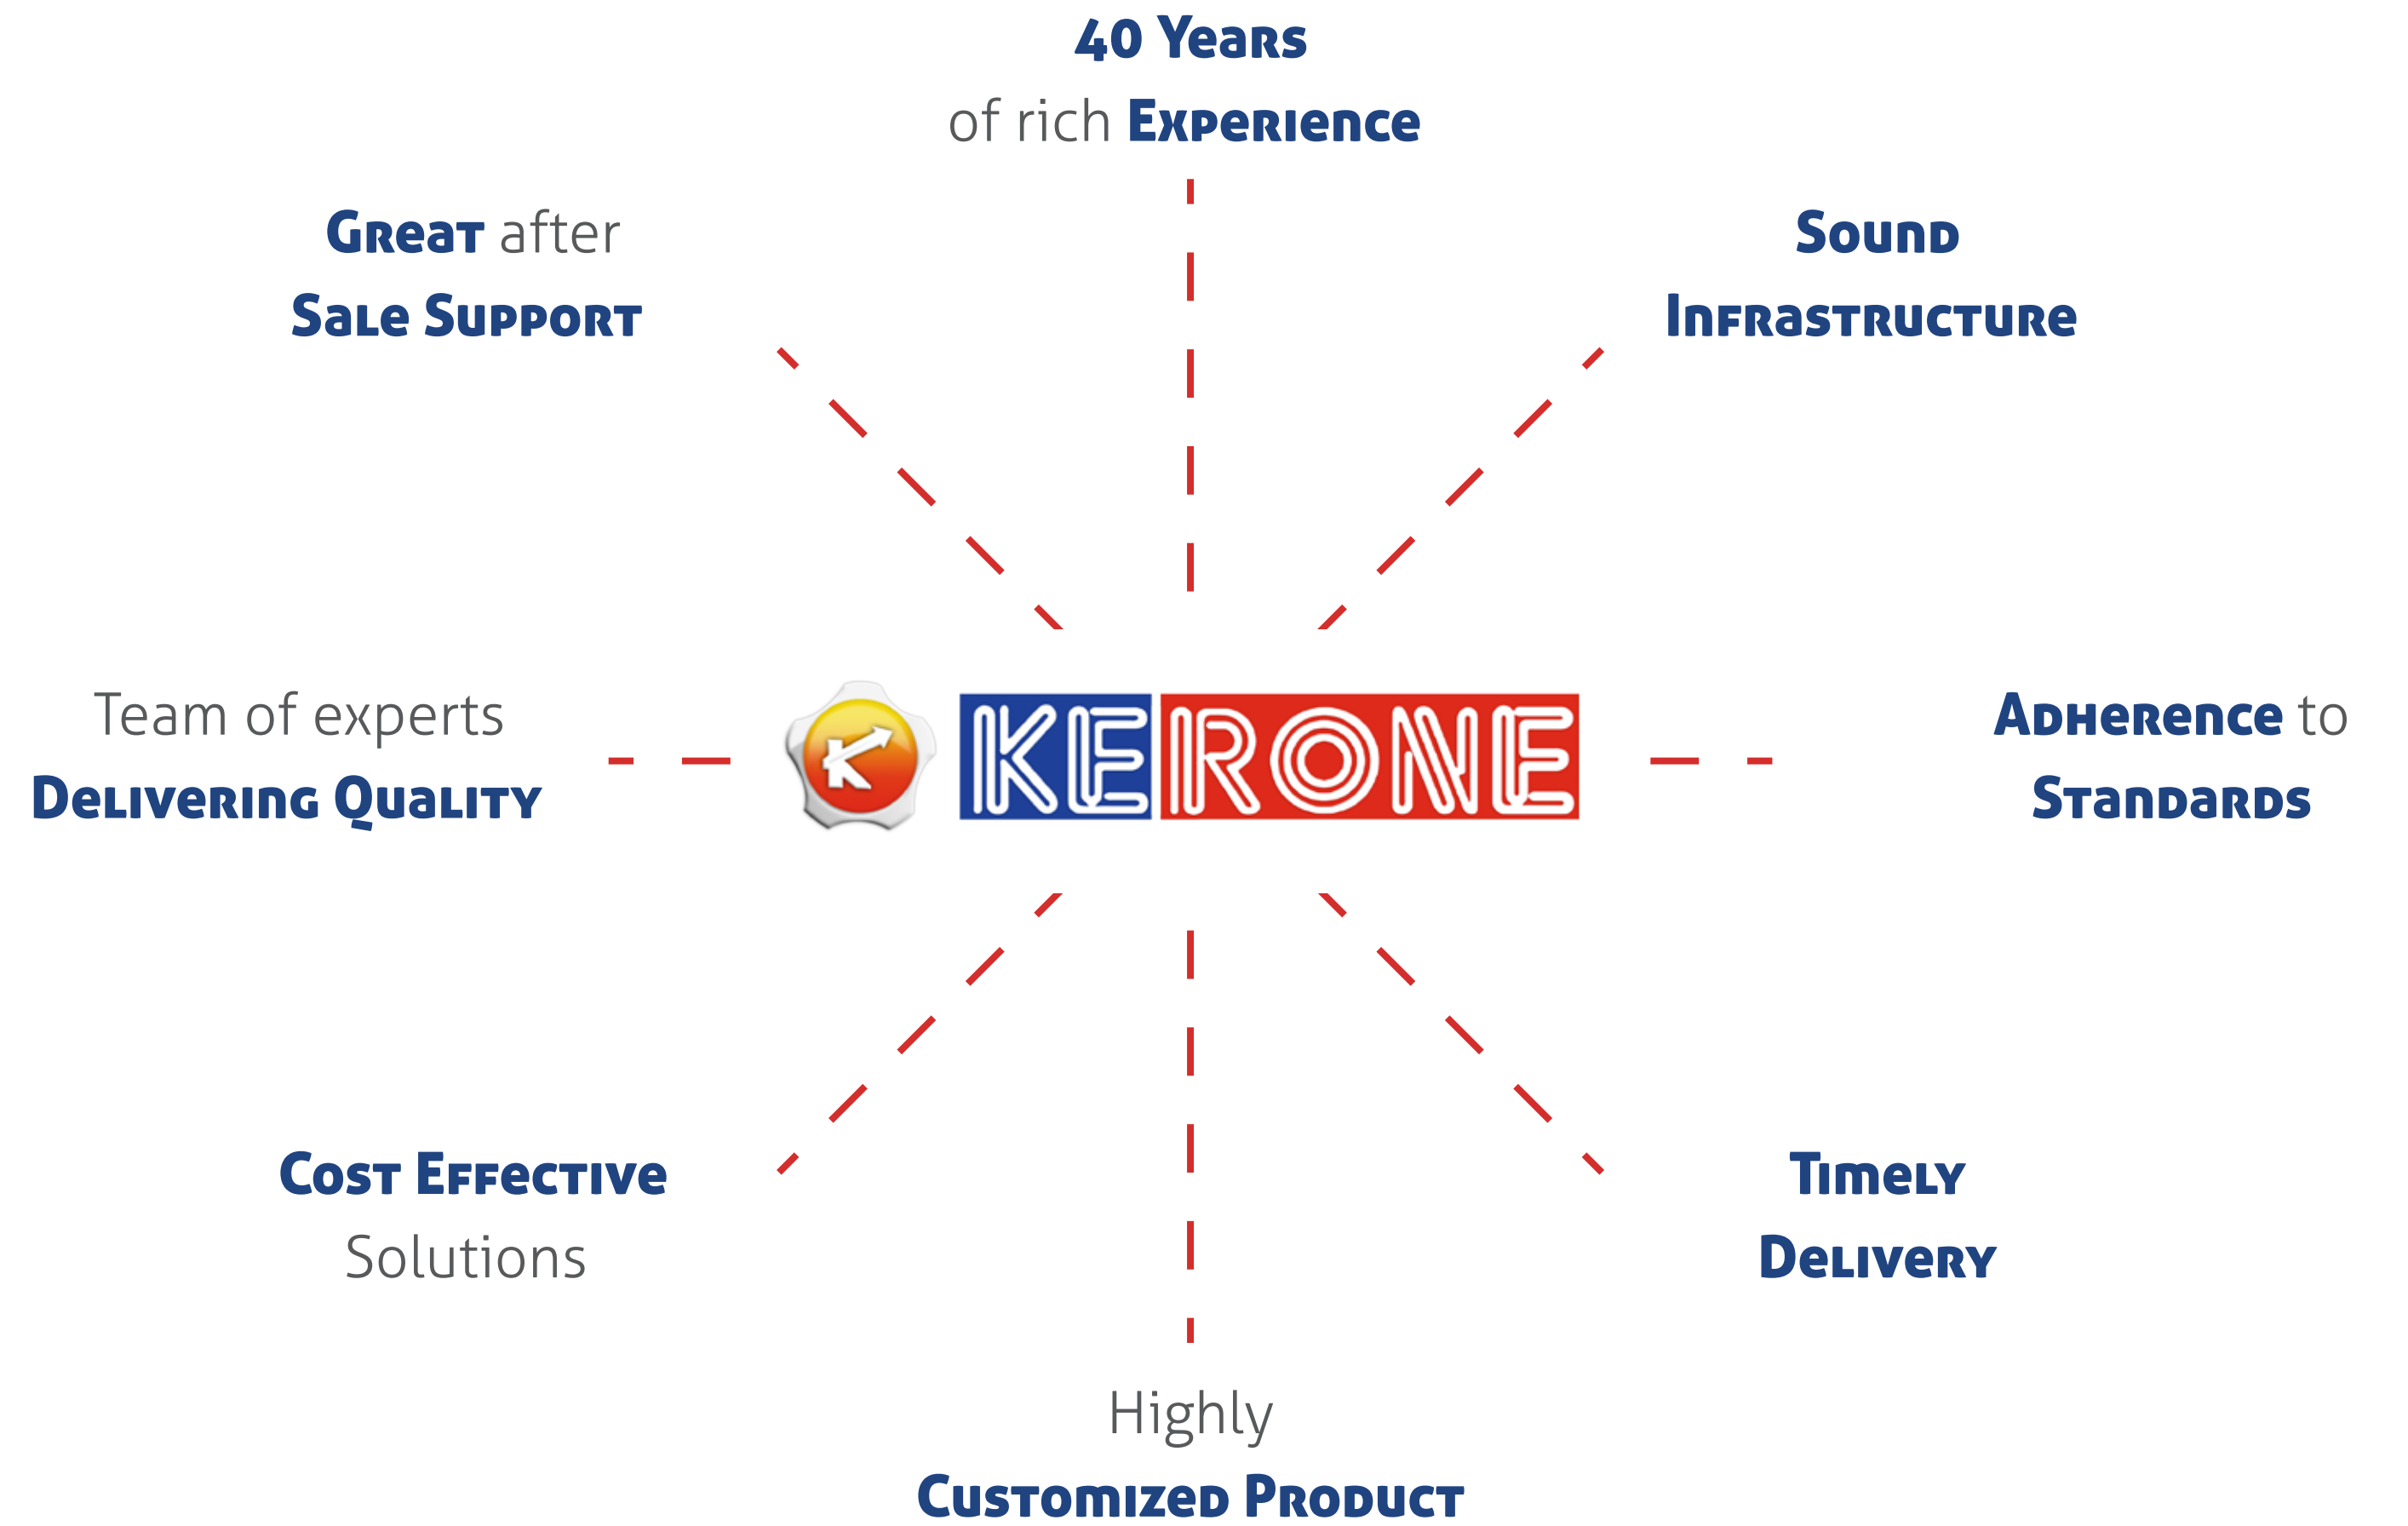

**“Enhance the value of customer operation through our customer need centric engineering solution”**

## *Mission*

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

## *Vision*

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to

# Impregnation Plants With IR Curing Ovens

"Impregnation" process of impregnating substances that has different chemical structure with some other material, impregnation process make the material more solid, durable and increases life span of material.

In the process if heating system play importance functions at different stages based on the methodology of impregnation process selected, hence selection of proper heating and drying system becomes prime requisite of process design.

An Impregnation infrared curing oven designed at KERONE based of the selected impregnation process provides process flexibility, long service life and exceptional energy efficiency. These systems are well suited to a wide range of curing tasks in impregnation plants.
