About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Sand Mould Curing / Drying Conveyor Ovens

Sand Mould curing is the process of drying/hardening the material that is placed inside the mould, to replicate the shape and size of the mould. Hence there is need of drying system that can harden or cure the sand inside quickly, at proper temperature efficiently.

The process should be clean and produce the desired output, hence the selection of proper Drying system becomes important.

Features:

- Continuous process due to conveyor
- Heating is highly controllable
- With IR heating system shape requirement is less
- Easy maintenance.
