About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

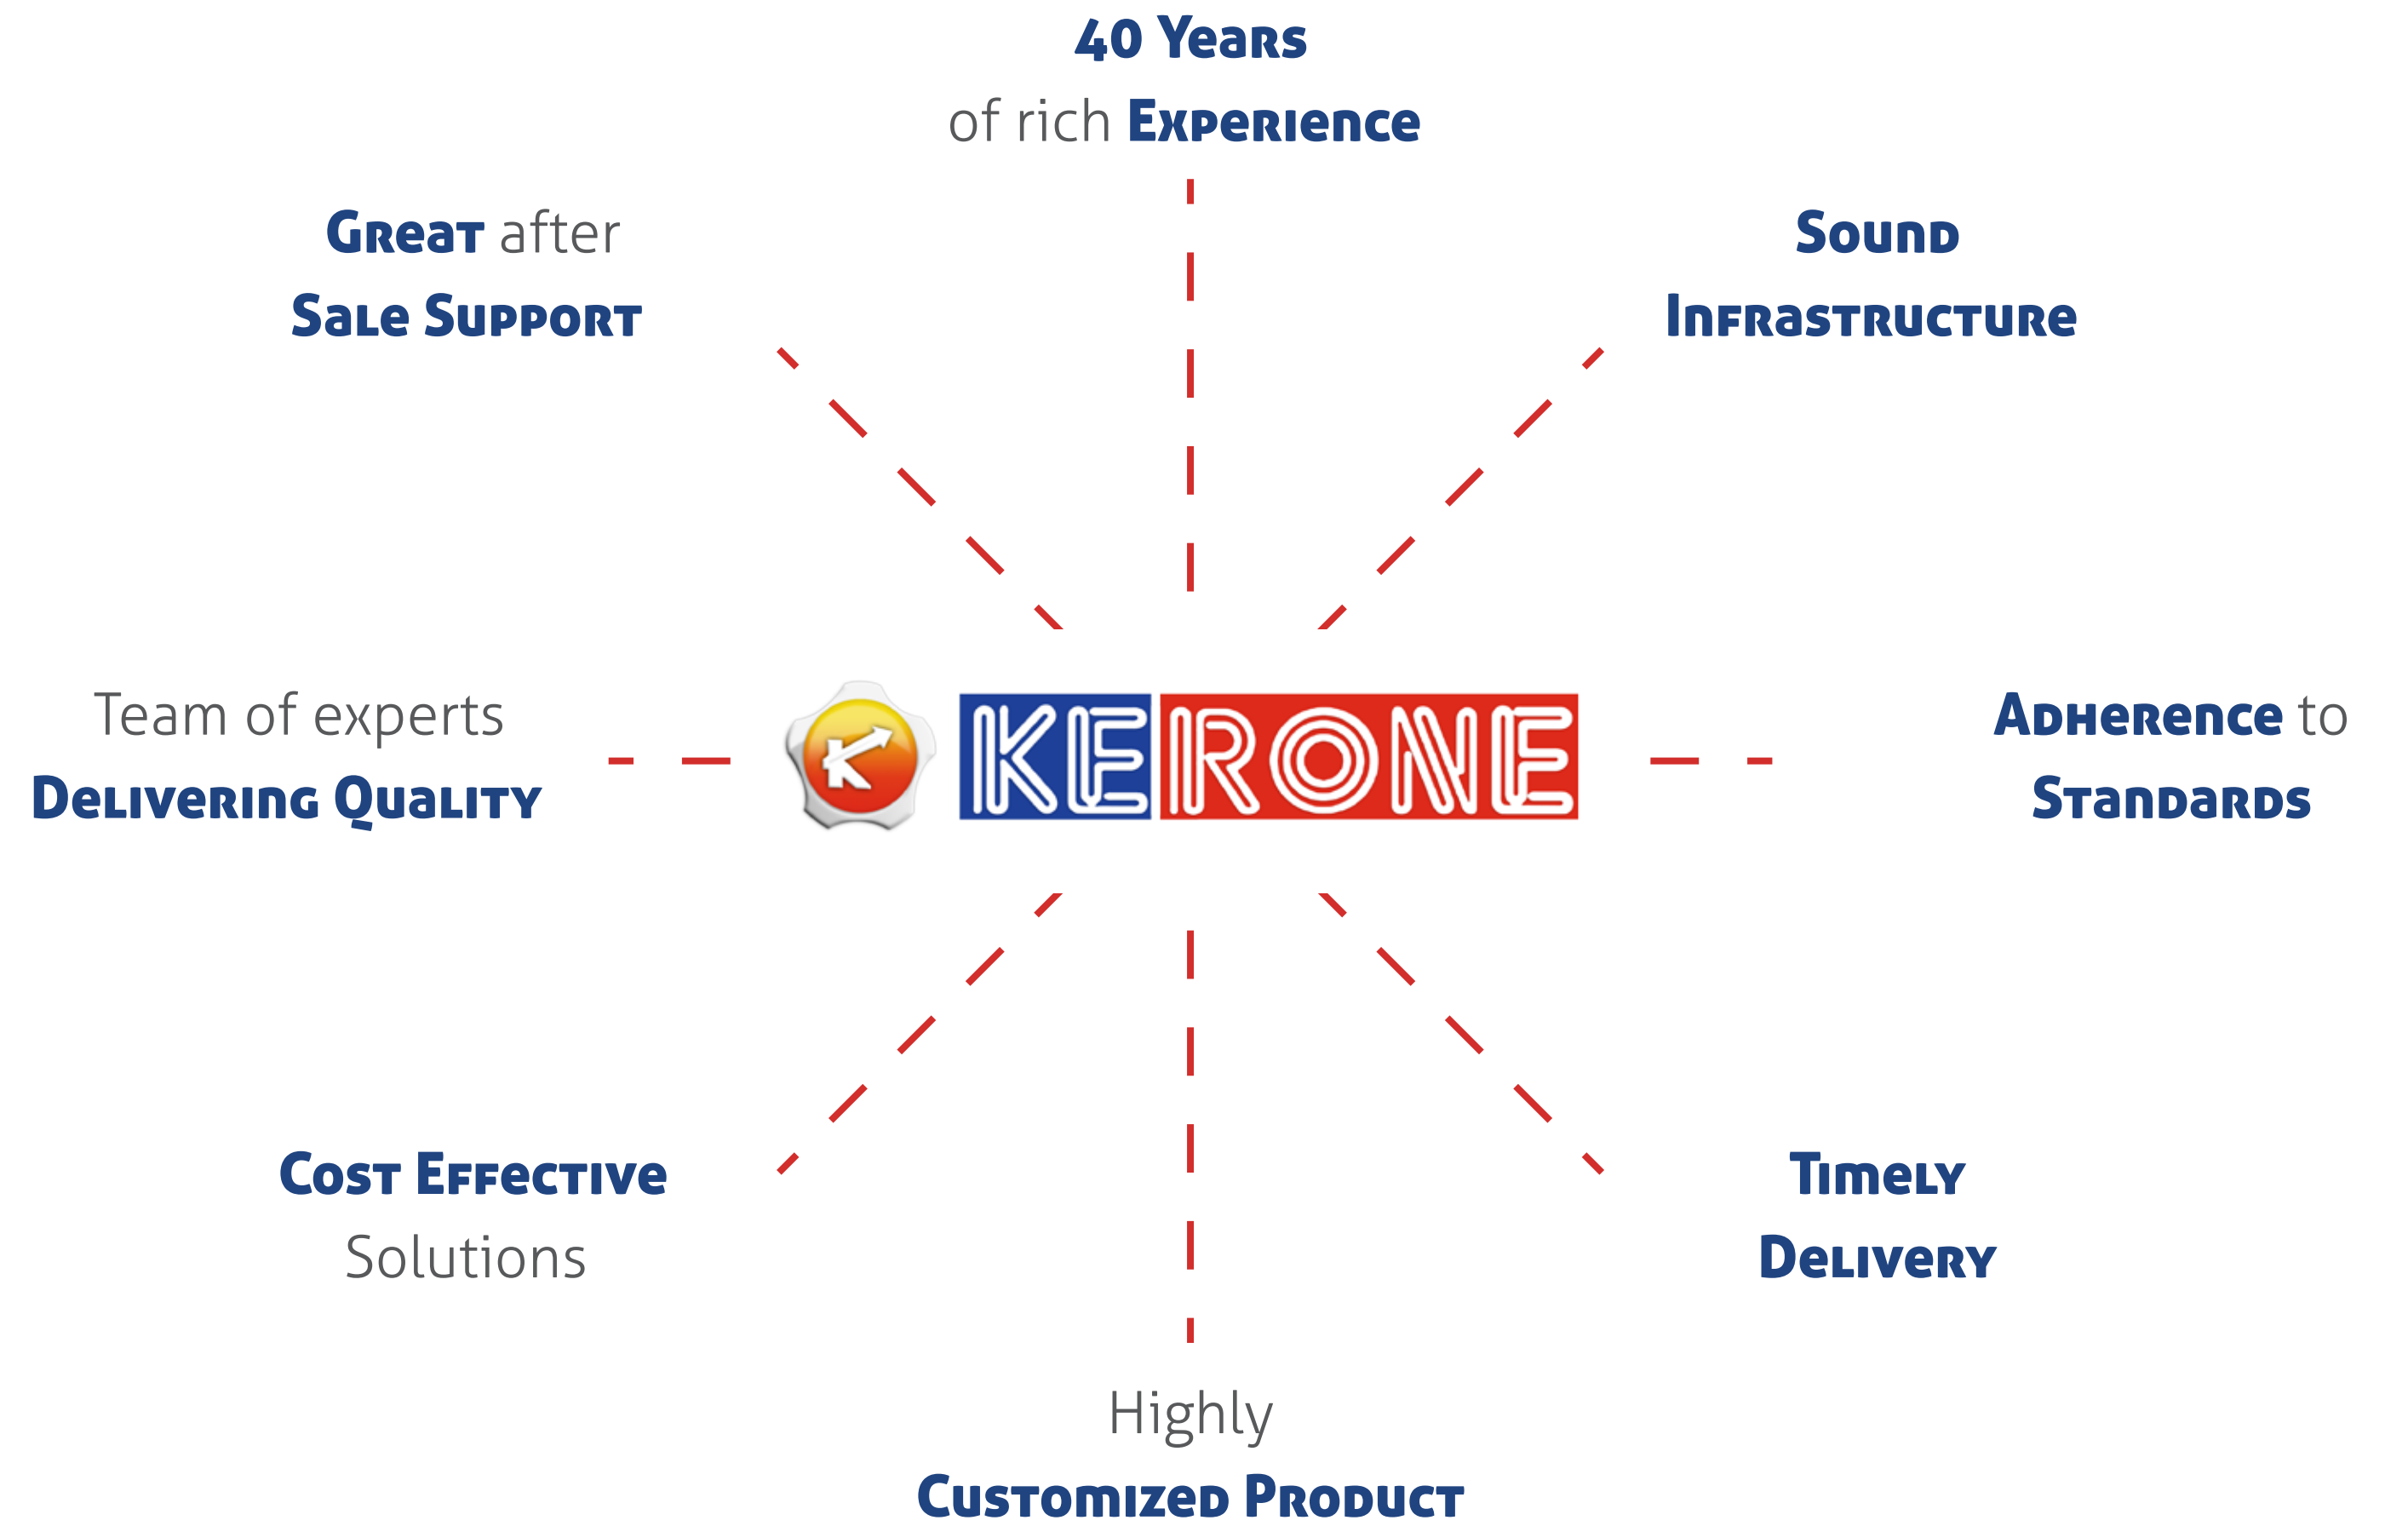

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Solvent Drying Systems

The main purpose of the solvent drying system is to remove/ evaporate the solvents from the material under process, the solvents can be of multiple type differs based on the material under the process.

Solvent Drying Infrared system is kind on solvent drying system that uses Infrared as source of heat, the capability of Infrared (IR) heaters to heat the surface of material very quickly with no waste of time and at very efficient manner.

Proper wavelength selection of for the drying process can help to generate high amount of heat in shorter area hence total size of drying plant becomes short, KERONE helps its clients in proper selection of heating system based on the need of the process.
