ISO 9001-2008 | ISO 9001-2015 | EMS 14001 | OHSAS 18001

# About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

**“Enhance the value of customer operation through our customer need centric engineering solution”**

## *Mission*

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

## *Vision*

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

## Introduction to Soxhlet Extraction Heater

Soxhlet Extraction Apparatus is suitable to heat Soxhlet flasks. The heating element is attached to fiber glass yarn-knitted fabric to provide flexible support to bottom of the flask. Glass wool insulation is used below the elements in the housing which is phosphate and powder coated attractively.

In the event of spillage the solvent will either evaporate or escape through the drainage hole below each element. The housing has two retort rods and a cross bar on which the extraction apparatus has a built-in regulator which controls the heaters.

The heating elements have individual on/off switches and a pilot lamp to indicate working of the elements. The apparatus requires a 230 Volts AC single phase supply.

# Features

- Heating element fasten to fabric for flask support.
- Gap between the metal casing and the heater is filled using glass wool.
- Solvent escapes through the draining hole below each element or evaporate in case of spillage.
- Extraction apparatus is fixed on housing having two retort rods and a cross bar.
- In-built energy regulator for controlling all the heaters.
- Heating elements with separate ON/OFF switches for convenience.

# Applications

- Institute.
- Medical College.
- Industries.
- Laboratories.
- Hospitals.
- Pharmaceutical Industry
