About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Steam Conveyor Ovens

At KERONE we manufacture the conveyerised heating/drying which uses a punctured belt to exchange input materials through the heater/dryer.

Steam or air is either passed under and through, or over and through the belt and item couch before being heated and re-flowed.

Units are ordinarily multiple heating zoned and may have varying steaming flow in progressive zones. Also each one zone may utilize an alternate temperature profile and control

Features

- Very close contact with Steam.
- Multiple temperature zones offer flexibility for temperature and process control
- Excellent transfer of energy from point to point
- Can vary flows between zones
- Careful handling of product
- Programmable speed control
- Self contained with distributed foundation loading
- Unit can have integral cooling section
